ABOUT ME

Information Systems student at UFPE and IT research fellow at ITCBio, where I work on dashboards, data collection, and process automation. I develop in Python, C++, and web technologies (React), take part in university outreach projects, and have advanced English (C2). I'm looking for opportunities to apply technology to solve real-world problems.

PROFICIENCIES

- Python, C++, HTML/CSS/JavaScript e React + Vite.
- Requirements gathering, competitor analysis, Notion, Google Sheets/AppSheet.

CERTIFICATES AND VOLUNTEER WORK

EnvelheSER Digital: Digital Literacy Project for Older Adults (2026.1)

- Planned and taught digital literacy classes for older adults, teaching computer use.
- Adapted materials and language to the pace and needs of the audience.

Claude Code 101 and Claude 101 Certificates
Anthropic Academy
Courses covering the fundamentals of generative AI, prompt engineering, use of the Claude API, and use of Claude Code for process automation and development support.

ACADEMICS

Federal University of Pernambuco (UFPE)
Bachelor's Degree in Information Systems
Mar 2026 – Dec 2029 (expected)

- Education grounded in programming (Python and C++), data structures, and object-oriented programming, reinforced by Discrete Mathematics and Calculus, which strengthened my logical reasoning. In group projects, I practiced collaboration and version control with GitHub.
- Participation in outreach and research projects linked to the program, with partnerships with the Recife City Hall and the UFPE Hospital das Clínicas (university hospital).

BLI Language School, Montréal, Canada
Cultural and Language Exchange (June – August 2022)

- Three-month French immersion program (summer camp), with language classes and daily interaction with students from different countries.
- Developed communication skills in a multicultural environment and independence from living and studying abroad. I currently have a B1 level in French.

CAREER

Research Fellow in IT and Software Development
ITCBio – Institute of Technology for Biosustainable Value Chains (2026–)
Screen and dashboard mapping, data/IoT architecture, and front-end software architecture and development.

LANGUAGES

Portuguese - Native
English - Fluent
